Lightning.

The curious fact has been observed that while taildings generally are more liable to accidents from lightning during the first half of the year than during the last, barns form an exception to this rule. In attempting to account for this it has been suggested that a full barn is warmer than an empty one and that the heated and somewhat moist air rising from the straw or hay is more conductive than cooler air and "attracts'' lightning,

MOTHERS and those about to become mothers, should know that Dr. Pierce's Favorite Prescription robs childbirth of its torture, terrors

and dangers to both mother and child, by aiding Nature in preparing the system for parturition. Thereby "labor" and also the period of confinement are greatly shortened. It also promotes an abundant secretion of nourishment for the child. During pregnancy, it pre-vents "morning sickness" and those distressing nervous symptoms from which so many suffer.

Tanks, Cottle Co., Texas.

DR. R. V. PIERCE, Buffalo, N. Y.:

Dear Sir—I took your "Favorite Prescription" previous to confinement and never did so well in my life. It is only two weeks since my confinement and I am able to do my work. I feel stronger than I ever did in six weeks before.

Yours truly,

Corda. Culfrepper

Dr. R. V. Pierce, Buffa.o, N. Y.:

Dear Sir—I began taking your "Favorite Prescription" the first month of pregnancy, and have continued taking it since confinement. I did not experience the nausea or any of the ailments due to pregnancy, after

a great deal of suffering. I was troubled a great deal with leucorrhea also, and it has done a world of good for me.

Yours truly,
